Operator Interface

Highest Standards · Ultimate Aesthetics The Aluminum Casing Technique (eMT Series)

Aluminum

The aluminum casing technique improves HMI operation temperature to -20~50°C , and efficiently avoids the noise interactions among devices.

Galvanic Isolation

This isolation protects HMI and your devices from destructions caused by voltage jump. The design for safe isolation complies with safety standards and requirements.

800 MHz A8 CPU

Cortex A8 processor core can operate at a high speed of 800 MHz, which greatly enhances the efficiency.

CAN Bus Supported

CAN Bus can be used in harsh environment for long distance and high speed data transmission. CAN bus is interference resistant, highly extensible which performs great communications.

I/O Device

MT600 Open HMI products equipped with RS232/485 /Ethernet /USB /SD Card standard interface for easier connection with printers, mice, and keyboards etc.

Members of the MT600 Family

Open HMI

Visual Studio, Embedded C++, Net, or the third party SCADA software can be used based on the need of your project to customize the environment and manage the development. Weintek Open HMI product is a complete and open solution.

Industrial Grade HMI

WinCE 5.0 (i Series)

WINCE 2.0

Windows CE (WinCE) is the operating system Microsoft especially designs for embedded system. Compared with general Windows systems, WinCE meets the required features: compact Kernel, customization, portability and real-time for embedded devices. Moreover, WinCE system can be run on hardware platform more reliably as well as provide higher compatibility in the development interface of Win32 API.

Since the kernel of WinCE succeeds WinNT technique, and combine MT600 hardware with 32bit real-time OS, it's easy for desktop programmers to develop the application or directly convert the software to WinCE platform.

On top of that, Weintek MT600 series support up-to-date software development tools for platforms integration such as DotNet CF, SQL Mobile, XML, etc. More than enhancing the Ethernet function, we provide a variety of network protocols for such as VoIP.

In multimedia, in addition to DirectX, we add COM-based (Component Object Model) project development model—Direct3D Mobile. Users are able to adopt 3D visual design in their applications.

Features in CE 6.0 (eMT Series)

Features in CE 6.0

eMT600 Series Embedded CE 6.0 enriches your experience in application. The innovative techniques and functionalities develop a dynamic user interface for your professionalized equipments and at the same time strengthen the online service of Windows 7 PC, servers. Windows Embedded CE 6.0 is designed for the cooperation with designers and developers to improve the performance of user interface and reduce the time and cost in development and therefore to enhance the support of device improvement.

Internet Explorer Embedded

Internet Explorer with panning and zooming capabilities and a customizable interface to optimize the browsing experience on devices

Flash Lite

Browser plug in to render rich media websites

Connection Manager

Infrastructure technology to manage multiple network interfaces on the device

Silverlight for Windows Embedded

The power of Silverlight brought to Windows Embedded CE to create rich applications and user interfaces

Touch and Gesture

Plug-in engine to enable natural input capabilities and gesture animations

Microsoft Office and PDF Viewers

Applications to render Microsoft Office Word, PowerPoint, Excel and Adobe PDF content on the device

Quality

Weintek places a high value on Product Quality Assurance.

Weintek is very proficient in Software/ Hardware Research and Development, and also possesses strong product manufacturing abilities and quality control. For quality control, Weintek strictly enforces ISO9000 standards. From bringing raw materials into the factory to manufacturing and production, a variety of testing equipment and software are applied, such as: vibration testing, low/high temperature testing, touch testing, performance testing, and communication testing... This guarantees that all products from Weintek to your hand are subjected to strict quality checking systems.

In addition to the rigorous standard testing process, Weintek professional testing engineers provide dedicated testing processes for the special features of different types of HMI. By accumulating professional testing experience, when evaluating a specific product, problems can be identified and solved faster and more accurately.

Our HMI products pursue the highest standards for research and development, design, and production. While designing the products, the standards and testing processes of materials, parts, tools, and equipment are all carefully managed to comply with international safety standards and environmental protection: CE/UL/RoHS

In addition to the above, Weintek provides great customer service by establishing 2 major systems: Customer Relationship Management (CRM) system and Service Request for feedback. Weintek not only meets quality standards completely, it goes beyond the customers' expectation of product reliability.

Weintek
WEINTEK

Taiwan · Weintek

Founded in 1995 in Taiwan, Weintek Labs. Inc., has dedicated itself to be a leading-edge designer and manufacturer of graphic operator interface, also known as Human Machine Interface. With a full line of products that range from all-in-one HMI solution to fully-loaded Windows CE and XP Embedded industrial computers, Weintek has a reliable and affordable operator interface for every application.

“Professional Supplier, Quality Product, Innovative R&D, Customer Satisfaction” are principals of Weintek business operations. Investing considerable budget and technical manpower in developing state-of-art technology, we pride ourselves on the introduction of many new and exciting products each year. Advanced facility, complete standardized operating procedure and rigid control system ensure the product quality to reach the highest standard. Since 2004, Weintek has been registered to ISO 9001:2000 and supervised by international quality organization, SGS.

We strongly believe that fulfilling customers’ satisfaction is our responsibility. Cooperating with experiential partners all over the world, we have well established the distribution channel in product promotion and local customer service. By efficiently work hand in hand among every link of the entire business, we have experienced yearly sales growth of more than 40%. Weintek started from domestic market under the brand name” EasyView”. In 1997 we expanded the sales territory overseas. With the remarkable sales success in China market, Shenzhen Weintek Labs., Inc. was established in 2004 under the brand name” WEINVIEW”.

The value of technology is to meet people’s needs. User-friendly, convenient and humanized products are the nature of the life and Weintek is the company to put this concept into practice.
